Publication III

Definition 18 incorrectly refers to $ACT_{tr}$ when it should have referred to $\mathcal{A}_{tr}$. The whole inputvector function definition should have been written as:

$$
\text{inputvector} : e \times \text{maxcc} \rightarrow \text{concat}(\text{onehot}(\#\text{activity}(e), \mathcal{A}_{tr}),
\text{onehot}(\#\text{cluster}(e, \text{maxcc}, cl)))
$$
