Errata II for "Advances in distributed Bayesian inference and graph neural networks"

Diego Mesquita

Author's Contribution

Publication II: "Federated stochastic gradient Langevin dynamics"
The idea for this came up after a series of discussions between the authors. I have proved the convergence bounds, which were later checked for correctness by Khaoula El Mekkaoui and Paul Blomstedt. I also implemented the illustrative examples and the ones for Bayesian metric learning. Writing was a joint task for all authors.
