“Hecht and co-workers have ascribed porous morphologies in spin coated ultrathin films prepared under high RH to dewetting.¹⁸⁴ ThisThis is in contrast to work by, e.g., Madej et al.¹⁸⁵ and Park et al.,¹⁸⁶ who claimed that the spin coating process proceeds too rapidly for the substrate to cool down enough for breath figure formation to occur.” should be “Hecht and co-workers have ascribed porous morphologies in spin coated ultrathin films prepared under high RH to dewetting.¹⁸⁴ They claimed that the spin coating process proceeds too rapidly for the substrate to cool down enough for breath figure formation to occur.
